

# Market Report

## 2021 Week 45

The abundant supplies of live pigs sat in the UK far exceed all available processing capacity at the moment and the backlog of pigs on farm remains. The pig roll is getting bigger but one major processor has promised it will uplift an extra 3,000 pigs per week, it is minimal but better than nothing. The SPP has fallen again this week to stand at 144.67p/kg, this is 3.55p lower than a week earlier. The continuation of very low prices right cross the EU are also playing a very major role in driving down the price of our pigmeat.

EU pig prices are still falling and this has been, according to AHDB, since June, current prices are particularly weak, 16% lower than last year. A very strong Chinese market being experienced in the last couple of years has cooled is an understatement, it is leaving a lot more pork and pork products to be traded in the EU and the UK, as logistics have become very expensive even if there was a marketplace for the product.

Cull sow prices have stood on this week as has major processor prices, there has been a little spot trade within a couple of abattoirs which we have taken but it still remains a great challenge to try and get waded through our pig roll before we get to Christmas otherwise we will be carrying it into the Spring of 2022.
